PROFESSIONAL SUMMARY

Full Stack and Flutter Developer with hands-on experience building scalable web and mobile applications using MERN, Flutter, Firebase, and Supabase. Skilled in designing end-to-end systems, RESTful APIs, and cross-platform mobile apps with clean UI/UX. Experienced in implementing authentication, payment integrations, cloud-based backends, analytics dashboards, and monetisation workflows. Passionate about solving real-world problems through technology with clean architecture and maintainable code.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
Backend	Node.js, Express.js, REST APIs
Database	MongoDB, Firebase, Supabase
Mobile	Flutter, Dart
Tools	Git, GitHub, Postman, VS Code

PROJECTS

Nike Redesign – Full Stack PWA E-Commerce Platform

[Live Demo](#)

Personal Project | React.js · Node.js · Express.js · MongoDB · Tailwind CSS · Razorpay

- Built a full-featured Progressive Web App (PWA) with separate user and admin panels, installable on mobile devices.
- Implemented email OTP authentication, JWT-based authorization, cart & wishlist management, and multi-address support.
- Integrated Razorpay payment gateway with order tracking, product reviews, ratings, and advanced filters (gender, color, price, rating).
- Developed an admin dashboard with product, coupon, and order management, plus Recharts-powered analytics covering sales trends and order metrics.

KoFund – Community Fund Recording App

[Download App](#)

Personal Project | Flutter · Dart · Firebase (Firestore, Cloud Functions, FCM, Storage)

- Designed and developed a multi-tenant Flutter mobile app enabling communities to manage funds, programs, and member contributions.
- Architected a scalable backend using Firebase (Firestore) with Cloud Functions handling business logic and automated workflows.
- Implemented push notifications via Firebase Cloud Messaging (FCM) and client-side PDF receipt generation for transaction records.
- Built a Pro monetization model with per-community subscriptions, automated reminders, and unlimited program support.

Fate Unwritten – Interactive Fiction Platform

In Development

Personal Project | Flutter · Dart · Supabase · Cloudflare R2 · Hive

- Building a mobile interactive fiction platform targeting Indian audiences, featuring branching narratives across dark, emotionally driven genres (paranormal, thriller, betrayal).
- Architected a cost-optimised backend using Supabase (PostgreSQL + Auth + RLS) for data and Cloudflare R2 for scalable media asset storage.
- Implemented offline-first reading experience using Hive for local caching, enabling content access without active internet connectivity.

- Integrating AdMob and RevenueCat for monetisation, with a phased AI-assisted story generation pipeline planned for future releases.

EDUCATION

B.Com – Computer Application | Calicut University

2021–2024

Specialised in Computer Application with a focus on business technology and information systems.

MERN Stack Development – 6-Month Intensive Course | Training Institute, Ernakulam

2025

Completed a hands-on program covering MongoDB, Express.js, React.js, and Node.js with real-world project development.

CERTIFICATIONS & TRAINING

- MERN Stack Full Course – Ernakulam (2025)
- Flutter & Dart – Self-taught with applied project experience (KoFund, Fate Unwritten)
- Progressive Web App (PWA) Development – Applied in Nike Redesign project
